

# 4' Protector Pass-Through Laboratory Hood, left window, 230V

View online: <https://www.labconco.com/product/4-protector-pass-through-laboratory-hood-left-window-230v/5325>

## Overview

Protector Pass-Through Laboratory Hoods offer sashes on two sides allowing operation on either side of the fume hood. An audible alarm sounds to prevent simultaneous opening of both sashes. With unobstructed visibility from either side, this hood is ideal for conducting chemistry demonstrations. An optional right-side or left-side viewing window further enhances visibility. These hoods may also be installed in the wall between two rooms for sample preparation.
