| Warranty               | 3 Years   |

## MORE ABOUT THIS ITEM

Cole-Parmer ultrasonic cleaners are extremely effective at removing dirt and grime which would normally require tedious manual cleaning. The high frequency ultrasonic wave vibrations create microscopic bubbles that implode violently causing the cavitation which creates an intense scrubbing action on the surface of the item being cleaned. The microscopic nature of the bubbles mean even the tiniest crevices will be cleaned thoroughly. Used in a wide variety of industries and applications almost any non-porous item that can normally be immersed in water can be cleaned with these units.

These stainless steel cleaners feature a bright LED display for time and temperature and easy push-button control. Sturdy rubber feet prevent movement while in use, handles allow easy portability, and the larger sizes (6 liter and above) have external drains for easy replenishment of cleaning solutions.
