

## HJ Series Standard Voltage Transformer

### I. Introduction

This product is a self-boosting, integrated and combined type voltage transformer which is specially designed for basic power supply and product department. We supply gas-filled standard voltage transformer and dry type standard voltage transformer.

### II. Features

1. It is compact conformation, small in volume, convenient to take.
2. Do not need maintenance, easy to connect and operate.

### III. Parameters

Voltage class	6kV, 10kV, 35kV, 110kV, 220 kV
Accuracy class	0.05, 0.02, 0.01
