Connection Schematics for Low Values

Low-value SCA's have 3 terminals -- **HI** and **LO**, and **GND**. The capacitance of the unit is shown as **CHL**. There is additional capacitance to the case shown by **CHG** and **CLG**. These capacitances will add to **CHL** unless the 3rd terminal, **GND**, is connected to the **GUARD** of the measuring instrument.

Low Value SCA Units

Connection Schematics for High Values

High-value SCA's have 5 binding posts -- **HI CURRENT**, **HI SENSE**, **LO CURRENT**, **LO SENSE**, and **GND**. This 4-terminal connection circuit has special wiring and low-resistance conductors to minimize dissipation and parasitic inductance, and improve frequency characteristics.
