Describe

Application:

It is widely used for curing in cellphone crust, compact disc, thin film switch, electronic and plastic crust UV surface to painting, kinds of UV paint, IMD injection products curing,electronic components, liquid crystal film, terminal gumming,hardware parts,plastic accessories,paper, glass,cellphone parts sticking and LCD etc.All products width within 200mm.

Technical Parameter:

outside dimension:850*500*850mm   Weight: 90KG

The length of inlet:170mm The length of output:170mm The width of belt:200mm

The height of inlet:232mm

The hetght of inlet point:50mm (adjusting is OK)

The material of belt:teflon (imported)

Light tube power:2.0KW*1pcs (the height of light shine can be adjusted)

The width of light shine:200mm

The length of shine area:200mm

The strength of shine:100W/cm

The distance of shine:120-190mm (adjustion)

Type of cooling: exhausting by air cooling

The value of wave crest:365nm

Settling time:about 3 min Convey motor:15W

Life 1,000 h (making sure 800h)

Decorative style:injection

Exhaust fan:20W-1 set, 40W-1 set Gross wattage:2.2KW

Convey speed:0-12m/min

Power supply:single phase 220v
