Describe

Large Size Tunnel Infrared Dryer Machine For Drying T shirt

Application:

It is suitable for drying kinds of materials products such as textile,flag,banner,aluminum sheet,glass,paper,plastic...etc after screen printing/painting/hot setting adhesive,inkjet printing...,etc

Machine design principle:

it is designed for lab and mass production.This conveyor belt system has quiet varying-speed motor,when the dryer is various loads, speed -adjusting driver and the speed of conveyor are Uniform,the height between belt and lamps can be adjusted,it is suitable for kinds of items which have different size.

Technical Parameter:

Machine size: 5000*1300*1500mm

Inlet length: 1000mm

Outlet length:1000mm

Heating area: 3000mm

Belt width:1000mm

Max.conveying height:100mm(it can be adjustable)

Material of belt: Teflon

Speed:1-10m/minutes

Lamp: Infrared lamps 20pcs

Temperature:200 degree

Lamp wattage: 1kw*20pieces

Power : 380V 50HZ

Advantages:

- 1.Hot heat room with shelter door which can be adjust open/closed to save energy.
- 2.Infrared lamps quantity can be adjust by your needs
- 3.Conveyor belt by electric motor control,high speed can be adjust according to production speed needs
- 4.There install hot air recycle system on top of machine.
- 5.Max temperature 0-200degrees can be adjust by your production needs
- 6.Machine Inlet/outlet can be adjust height up/down according different products height.
- 7.Every accessories distance/size can be adjust separate by panel bottom
