

# QC-101B1 Carton Compression Tester

## Standard

---

## Description

---

Carton Compression Tester provides a environment to test the compression resistance of carton. To use a fixed speed to compress and test the specimen, and to obtain the compress endurance. When the container is broken, this machine will stop automatically, and hold the max.

## Appearance

---

## **Specification**

---

Max Capacity	2000kg/5000kg
Power	Single Phase,220V ,10A
Test Space	120x120x100cm
Weight	800kg
Dimension	175*100*200cm
Test Speed	1~300mm/min
Test Speed	1~300mm/min

## **Features**

---

To test the compressive strength for large packing receptacle is to imitate the damaging condition when stacking and transferring the paper carton, oil drum, packing bag. Directly set the pressing speed on large moveable pressing plate to compress the receptacle until damaged. Record the maximal compressing force for determining the design for packaging.

\* Cometech reserves ultimate modification right of product specification.
