

QC-GS Holder for Hardness Gauge

Standard

Description

To test the hardness of material rubber and plastic, in the various standard requests, all have to provide a constant vertical load, to less the measure error to least. The load of this tester can be changed according to material to meet the requests of various standards.

Appearance

Specification

Weight	18KG
Dimension	18 ×20 ×42cm
Specimen Height	Adjustable
Measured Loading Weight	1KG, 5KG (1KG+4KG)
Measured Loading Weight	1KG, 5KG (1KG+4KG)

Features

Holder for Hardness Gauge. When use hardness tester to do test on rubber or plastic, normally user holds the meter by hand and doing the test; although it is convenience, but if the required error range is small, this method is not objective. That is why we design this stand to do the measurement; it has all the good points:

1. Accuracy is high
2. Easy to use
3. Reduce mental error
4. Extend the using life of hardness tester (Because it is fixed on stand)

* Comotech reserves ultimate modification right of product specification.
