

Distinctive "performance" and "design"
The leader of 4th-generation digital testers

KMT

► Summary

The tester is to evaluate the fatigue of the stimulus by giving fatigue to the product or specimen that is complied with the reliability test requirements. Designed and manufactured to meet the requirements of the customer. It is an indispensable device for evaluating the durability and testing the limits of the components of the automobile. This design is initiated by the customer's request.

► Features

- Reclining durability test and seat slide test for automotive seats
- Power output voltage and variable current tests on DC motors with PWM module power supplies

KSC-M3 / Strut Cutter / Automobile & Durability

▣ DETAILED INFORMATION

► Specification

Power : AC 220V, 50 / 60 Hz, 1 Phase

Control Method : Axial Rotation Cutting Method

Stop Function : Automatic Sensor Detection

Size : 700(W) X 500(D) X 1,550(H) mm

► Application

Car Struss Cutting
