HD-JY Insulation tightness test stand

The insulation tightness test stand is developed with reference to relevant standards such as UL1581. It can test the insulation tightness of FXT, CXT and stranded XT wire cores; it can also test the insulation tightness of non-woven parallel cord power cores other than gold wire.

Technical Parameters:

Serial number	Project	Specifications
1	Test line length	11 in ,16 in
2	Weight	4LB,8LB
3	Dimensions	500 X 180 X 850 (Width X deep X height)
4	weight	About 30 Kg
