Cup process tester

L-QBJ

1. Use of QBJ cup dash tester

QBJ type coating cup process testing machine is suitable for evaluating the coating of varnish and related products (single layer or matching system coating) under the experimental method stipulated in the standard, carry out the compression test, make it gradually deformation, its coating anti-cracking or anti-separation performance of metal material, evaluate the coating through or not through. The compression depth may also be increased gradually to determine the minimum depth at which the coating has just cracked or has begun to break away from the substrate.

2.QBJ cup dash tester standard

QBJ coating cup dash tester standard: ISO1520, GB9753-88

3.QBJ cup process testing machine parameters

1. Compression diameter: 20mm
2. Maximum depth of compression: 10mm
3. Compaction precision: 0.05mm
4. Digital display index value: 0.01mm
5. Maximum compressive force: 1000N
6. Specification: 70mm*70mm*0.03mm ~ 1.25mm

4. Configuration of QBJ cup dash tester

1. One manual

2. One certificate of qualification
3. One packing list
4. One cup process tester
5. One calibration plate
6. One power cord

Recommended

-

Automatic tool metallographic measuring instrument V400

•

Automatic tool metallographic measuring instrument V800

•

Automatic tool metallographic measuring instrument V1800

-

Automatic tool metallographic measuring instrument V2000
